Report to the Board of Supervisors on Girls' Fastpitch Softball Equity

July 2007

Prepared by:

Girls' Fastpitch Softball Equity Action Plan Review Team:

Fairfax County Commission for Women

Fairfax County Athletic Council

Fairfax Athletics Inequities Reform

With support from:

Fairfax County Department of Community and Recreation Services

Fairfax County Park Authority

Fairfax County Public Schools

Acknowledgements

We would like to thank all who were involved in the improvements to girls' fastpitch softball. The Department of Community and Recreation Services (CRS) -- with lead responsibility -- made improvements through arrangements with schools and the Park Authority, established a new field policy, and led the effort for the diamond field maintenance program at schools. The Fairfax County Public Schools (FCPS) has made major upgrades and improvements to the girls' varsity softball fields. FCPS has continued to support the community's use of their fields, requiring additional duties associated with providing space for community use. The Park Authority has made a number of improvements and has developed the new Level 1 fields at Wakefield, Nike, and Towers; installed lights at Colin Powell ES; and now implements a standardized maintenance programs on FCPS diamond game fields. The Athletic Council has supported this program throughout. The Girls' Fastpitch Softball Equity Action Plan Review Team (APRT) members have given many hours to develop recommendations to CRS for improvements and have advocated for the fields at Wakefield. The Board of Supervisors established and funded this improvement effort and gave special funding for the new fields at Wakefield Park. Without their commitment and support, the softball equity effort would not have been possible.

Fairfax County

Report to the Board of Supervisors on Girls' Fastpitch Softball Equity

July 2007

Updated April 2008

The members of the Fairfax County Board of Supervisors:

Chairman: Gerald Connolly
Braddock: Sharon Bulova, Vice Chairman
Dranesville: John Foust
Hunter Mill: Catherine M. Hudgins
Lee: Jeffrey McKay
Mason: Penelope A. Gross
Mount Vernon: Gerald W. Hyland
Providence: Linda Q. Smyth
Springfield: Patrick Herrity
Sully: Michael R. Frey

The members of the Girls' Fastpitch Softball Equity Action Plan Review Team:

Commission for Women and Chair: Emily McCoy
Commission for Women: Terry Wanbaugh
Fairfax Athletics Inequities Reform: James Collins
Fairfax Athletics Inequities Reform: Kevin Norris
Fairfax Athletics Inequities Reform: John Thompson
Fairfax County Athletic Council: Rogers Sims
Fairfax County Athletic Council: Bill Pruiett
Female Athletics Representative: Jeanne Kelly

Staff Members:

Fairfax County Department of Community and Recreation Services: Patricia Franckewitz, Director; Karen Avvisato, Athletic Services Division Supervisor
Fairfax County Public Schools: Paul Jansen, Director of Student Activities; Sherry Brathwaite, Office of Equity and Compliance
Fairfax County Park Authority: Tim White, Acting Director; Todd Johnson, Director of Park Operations

Executive Summary

Excellent progress has been made in our efforts to achieve equity for the county's girls' fastpitch softball players. In fact, girls fast pitch softball equity essentially has been achieved in the county for the community users and at high school athletes.

Over the last ten years, the county has spent over \$2,159,024¹ on this specially funded effort to improve girls' softball fields. Additional funds not included in this figure were for new fields at Wakefield Park; several Fairfax County Park Authority (FCPA) projects, and FCPS high school field projects. The result is that every girl who plays fastpitch softball in this county has benefited from this effort.

Effort on the part of the county, the FCPA, the FCPS, and the athletic community will be required to ensure that progress continues and that the results of these efforts are maintained. Among the future steps are: continue field improvements; continue the diamond field maintenance program at the schools; and adopt or enforce guidelines to proactively maintain equity between softball and baseball programs affecting FCPS, FCPA, and CRS. These issues are discussed in the attachment to this report, "Guidelines to Ensure Continuing Equity for Girls' Softball in Fairfax County."

¹ This amount includes \$1,000,000 of lighting funds, which was equal to the amount spent on boys' baseball lighting improvements during the same period.

1. Findings and Recommendations

Background

The issue of equity between boys' baseball and girls' fastpitch softball facilities in Fairfax County was brought to the attention of the Board of Supervisors in August, 1997. The Board directed the Department of Community Recreation Services (CRS) to develop a plan to improve the fields for girls' fast pitch softball throughout the county. The purpose of the effort was to ensure equity of facilities as to quantity, quality, availability, allocation, scheduling, location, safety, and maintenance. The Board also directed that a citizen Action Plan Review Team (APRT) consisting of representatives from the Fairfax County Athletic Council, Commission for Women, Fairfax Athletics Inequities Reform, and female sports, assist in the development of a plan and monitor its implementation. A plan was developed and presented to the Board in early FY 1998. Special funding was approved and later incorporated in the annual budget for a period of five years.

The effort faced many challenges. New relationships had to be forged between CRS, the Fairfax County Public Schools (FCPS), and the Fairfax County Park Authority (FCPA) to affect school and park field improvements. There were continual changes to the FCPA fields in player participation by region and in key management and other staff. Other changes impacting the effort included a new field policy by CRS, new scheduling software, and user fees, which have resulted in improved information on participation and field use.

The APRT served in an active role as the plan was developed, implemented, and updated. The effort continued beyond the initial five-year period called for in the plan as portions of the plan encountered delays.

Scope

The scope of the effort for facilities included "all public athletic facilities within the county boundaries." The population focus included community girls' softball and boys' baseball programs for ages 7-18, as well as high school varsity baseball and softball programs.

Approach

The first principle was to ensure equal field quality between boys' baseball fields and girls' softball fields in proportion to the number of participants. For example, the relative number of Level 1² fields for boys and girls should be in the same proportion as participation by boys and girls. Similarly, the number of Level 2 fields for boys and girls should be in that same proportion.

Another principle was to improve equity for girls' softball by improving fields historically allocated to softball rather than reallocating fields that had traditionally been assigned to baseball.

Goals and objectives were developed to articulate the specific equity targets. These gave a concrete way to determine when equity had been achieved. These goals took into account the needed capacity and differences between softball and baseball.

This report provides the level of participation, improvements made based on funding provided to CRS, and a

² The definition of Level 1 fields: lighted, irrigated, and seasonally maintained through weekly cutting and infield grooming three times per week. Level 1 fields are also usually fenced and have covered dugouts and bleachers. Level 2 fields: lighted or irrigated, maintained by weekly cutting and infield grooming 2 times per week.

summary of relative condition and number of scheduled baseball and softball fields, including all high school varsity softball and baseball fields. Following a summary and recommendations, progress toward each goal and objective is summarized.

Participation

Community users between 7 and 18 years of age include 3,230 softball players (21.9% of the total youth diamond field users) and 11,521 baseball players (78.1%), of which 8,198 (55.6%) play on and 3,323 (22.5%) play on 90 foot.

Summary of Improvements and Expenditures

The chart below shows how funds were spent, including both special funding for softball fields upgrades and funds for softball lighting.

Site Type	combined items	sideline fences/backstops	dugout upgrades	bleachers	irrigation	lights	Equip. Storage and Tractor	batting cage/pitching station	Turf	press box	dirt, maint, bases, electricity, porta jons	Grand Total
Number at ES, MS	1	7	4	1	2	2	6	3	1			
Number at HS	2	6	7	2	4	5	14	4	2	2		
Number In Parks	1	1	1	0	2	2	3	0	0

BB/ASB shared							4			
Adult Softball	9		2				14			
Not Scheduled (temporarily)										
Totals (SB/BB/shared)	87		66				220			

Recommendations:

For Board of Supervisors:

1. Continue funding the school diamond field maintenance plan and upgrade as necessary to match the maintenance schedule for park fields. For example, infield care is performed 3 times per week for park fields, but only 2 times per week in for school fields under the maintenance plan.
2. Provide funding to ensure care for or replacement of added amenities on elementary school, middle school, and center fields. The APRT’s work has resulted in many significant upgrades to FCPS fields. However, there is no available funding to maintain or replace these amenities, resulting in unsafe conditions in need of repair.
3. As part of the regular periodic review of the county's athletic field allocation policy, direct CRS to review and present to the FCAC policy review committee measures of gender equity, as established by the APRT, to guide recommendations for policy revisions and facility development and improvement plans. Measures of gender equity should include an inventory of field conditions, amenities, and use; a summary of complaints and organization appeals; and participation patterns and trends.

For School Board:

1. Adopt a strong softball and baseball field standard such as that in the *Public Facilities Manual*. Any new standard shall not reduce standards already maintained by schools such as scoreboards, masonry press boxes, and dugouts.
2. Continue to ensure existing guidelines are followed and to proactively maintain equity by annually reviewing field conditions for gender equity.
3. Continue to work with the Park Authority and Board of Supervisors to bring the JEB Stuart High School varsity softball field (at Stuart Park) up to a Level 1 standard (i.e., to light the field).
4. Whenever possible, replace temporary fencing with permanent fencing on girls’ softball fields.

2. Progress toward Goals and Objectives

The APRT developed four goals with specific objectives underneath each. The objectives served as the guidance for development of the specific action plan that detailed improvements to fields, policy changes, and other actions to achieve equity. This section describes the progress made toward these goals and any outstanding issues that still remain.

Goal 1: To provide FCPA Level 1, or comparable, multi-field (five fields), tournament capacity location for girls' fastpitch softball.

Target: From May to August support ten tournaments at three tournament sites, with one site having at least five fields. Each tournament would each support 16-teams in 3 of 5 age groups.

Objective 1: To establish a plan for developing a centrally located multi-field (five fields) tournament complex at Wakefield Park specifically designed for girls' fast pitch softball with capacity to hold National and International tournaments.

FY 1998: No park-based multi-field complex for girls' fastpitch softball

FY 2007: A permanent three-field Level 1 capability at Wakefield Park, plus three additional fields available with the use of temporary fencing

Outstanding Issues: Need to convert at least two existing adult softball fields at Wakefield to girls' fastpitch softball specifications.

Objective 2: To develop an interim solution to the lack of a five-field complex by maximizing use of FCPS facilities as tournament complexes in addition to regular play by house leagues in the spring and fall, through development or conversion of high school junior varsity fields.

FY 1998: No school-based multi-field complex for girls' fastpitch softball.

FY 2007: Multi-field (four fields) complexes at Madison, Falls Church, and South Lakes high schools. Upgraded 18 fields at schools to game quality (Levels 1 and 2).

Outstanding Issues: None

Goal 2: To provide equal access for girls to quality Level 1 and Level 2 facilities

Target: To increase the number of Level 1 girls' softball fields in proportion to the relative number of teams and players. To increase the number of Level 2 girls' softball fields in proportion to the relative number of teams and players.

Objective 1: To increase the number of Level 1 softball fields and/or increase the number of time slots given to girls' fast pitch softball on existing FCPA Level 1 fields.

FY 1998: Only one lighted school softball field. Two Level 1 FCPA softball fields (South Run and Wakefield). No provision in budget for softball field lights.

FY 2007: 17 lighted FCPS varsity softball fields with permanent fencing. 6 lighted FCPS softball fields with portable fencing; 7 Level 1 fields in FCPA parks (three at Wakefield, one each at Towers, Nike, Sandburg, and South Run); one lighted Level 2 field in park (EC Lawrence); 8 FCPS non-varsity lighted fields. \$100,000 per year funding for girls' fastpitch lighting, matching baseball.

Outstanding Issues: Need lights on girls' softball field at Lee District Park.

Objective 2: To maximize use of existing facilities at FCPS high schools, middle schools and elementary schools by developing or upgrading existing fields to Level 2 (game quality).

FY 1998: Only one Level 1 school softball field. There were several fields below a Level 2 standard.

FY 2007: 30 Level 1 and seven Level 2 school softball fields.³

Outstanding Issues: None

³ Subsequently exceeded this objective.

Goal 3: To provide a level of maintenance equal to FCPA standards on all comparable softball fields designated for primary use by girls' fast pitch softball, including school facilities.

Target: To perform maintenance to Park Authority standards on 100% of those fields at schools and other locations scheduled for primary use by girls' fast pitch softball to sustain the quality of the fields.

Objective 1: To perform sufficient regular maintenance on diamond fields to protect the investment in the development or upgrade/conversion of those fields and maximize their usefulness.

FY 1998: No county-provided maintenance for community use of FCPS fields or any field outside the Parks (e.g., recreation centers).

FY 2007: At first, achieved game and tournament fields maintenance on priority basis by FCPS with CRS funding. Later, FCPA provided mowing, annual over-seeding, and aeration. The Board of Supervisors has approved a new maintenance plan consolidating FCPA and FCPS fields under FCPA. The plan, which went into effect on 1 November 2005 (FY 06) includes weekly mowing and dragging infields and a yearly renovation schedule.

Outstanding Issues: None

Objective 2: To have sufficient funding and staff to adequately maintain softball fields in Fairfax County.

FY 1998: No maintenance provided for community use on FCPS fields or any non-FCPA field

FY 2007: The Board established consolidated maintenance for baseball and softball fields at FCPS sites beginning in FY 2006.

Outstanding Issues: None

Goal 4: To establish planning guidelines for future development and use of fields at Park Authority, public schools, and other county facilities.

Target: Future development of Park, public schools, and other sites includes a geographically appropriate distribution and use of diamond fields.

Objective 1: To develop and establish guidelines for girls' fast pitch softball field development.

FY 1998: No planning for girls' fast pitch softball fields was apparent. Allocations of fields were left to leagues with no accountability as to gender equity.

FY 2007: Girls' fastpitch softball field specifications were added to the county's *Public Facilities Manual*, and this specification was recommended to the FCPS for adoption. Established batting cage standards for girls' fast pitch softball. Provided double first bases on all FCPS and all fields used by the community at schools, centers, and parks. Established specific girls' fastpitch softball representation on the FCAC.

Outstanding Issues: Need to adopt a strong softball and baseball field standard such as that in the *Public Facilities Manual* while not reducing standards already maintained by schools, such as scoreboards, masonry press boxes, and dugouts.⁴

Objective 2: To develop and establish guidelines for girls' fast pitch softball field allocation and utilization.

FY 1998: No guidelines existed other than Title IX for FCPS.

FY 2007: Community Use of Fairfax County Public Athletic Fields Policy and Procedures, January 30, 2003, (attached) incorporates requirement for gender equity, and gives CRS control of field allocation at the sport level (e.g., girls' softball, adult softball, baseball, and soccer) rather than at the league level.

Outstanding Issues: None

⁴ It should be noted that the FCPA does not plan to build any new 60 ft baseball or softball fields in its current 10-year plan.

Attachment 1

Guidelines to Ensure Continuing Equity for Girls' Softball in Fairfax County

Introduction

The issue of equity between the boys' baseball and girls' fastpitch softball facilities of Fairfax County was brought to the attention of the Board of Supervisors in August 1997. The Board directed the Department of Community and Recreation Services (CRS) to develop a plan to improve the fields for girls' fastpitch softball throughout the county. The purpose of the effort was to ensure equity of facilities with regard to quantity, quality, availability, allocation, scheduling, location, safety, and maintenance.

As outlined in the Board report, equity has been achieved. There now exists a need for a summary of guidelines that will enable equity to be sustained. This attachment outlines those guidelines in terms of field allocation, facility maintenance, tournament complexes, and the need for periodic reviews.

It should be noted that the Girls' Softball Council is an official advisory body to CRS and is part of the Fairfax County Athletic Council. Concerns and issues regarding girls' softball can be directed to CRS, the Fairfax County Park Authority (FCPA), and the Fairfax County Public Schools (FCPS), through the Softball Council.

Field Allocation

Standard operating policies and procedures provide guidelines and processes for helping maintain equity through field allocation and usage. Specifically:

- The Field Allocation Policy, as well as FCPA and FCPS regulations, ensure that permitted groups have first right to fields and that non-permitted groups must vacate fields if groups holding permits for that day and time are present. Several county and FCPS agencies employ staff to monitor and enforce field use rules. As a last resort the police would be called.
- CRS will schedule fields based on intended usage/field design (i.e., fields will be used for sports for which they were designed). CRS has revised the allocation policy to ensure allocation directly to the sport and not to the association. However, groups that need additional space to satisfy their needs under the Field Allocation Policy may be scheduled on similar field types not specifically designed for that sport. In this case, CRS will work with the field owner (i.e., FCPS or FCPA) to ensure necessary precautions and adjustments are made.
- CRS regularly meets with the FCPS Community Use Office and the FCPS Design and Construction Office to discuss school facilities that will be unavailable for the coming season. The three parties identify opportunities to minimize impact on community use by making modifications and/or reopening facilities that can be accessed.

Maintenance

Necessary repairs or service needs (e.g., the repair and replacement of all amenities, such as dugouts, bleachers, backstops, fencing, and irrigation systems) on FCPA fields should be reported to the local park

manager; high school field issues should be reported to the school's director of student activities; and other school field issues to CRS staff. In general, field and amenities are the property and responsibility of the owner (i.e., FCPS or FCPA); however, there are some exceptions where an agreement between the owner and a user group assigns such responsibility.

Any issue with regular maintenance (grass-cutting, infield grooming, etc.) should be reported to the Park Authority staff in charge of the regular maintenance program on school fields. If an organization plants Bermuda grass, that organization is responsible for the grass-cutting to standard level year round.

Equipment and vehicles purchased by the county as part of previous arrangements for maintenance of girls' softball fields at various high school sites should be maintained by FCPS and should be available for softball use as a priority.

Tournament Complexes

Falls Church High School, South Lakes High School, Madison High School, and Wakefield Park all contain multi-field complexes suitable for girls' fast-pitch softball tournaments. These specific sites were targeted for facility upgrades as part of the efforts to reach equity for girls' softball participants in the county. These fields will continue to be maintained to current standards. Additionally, CRS and the FCPA help ensure adequate access to restroom facilities or portable toilets for both tournament use and regular community use.

It is further recognized that girls' softball now has three permanent fields at Wakefield Park with others available by means of portable fencing. Just prior to a girls' softball tournament at Wakefield Park, the county (currently through CRS) ensures the set up of temporary fencing at 200 feet on the existing three adult softball fields, and FCPA sets bases and grooms fields. The softball community understands and CRS intends that adult softball will be moved from Wakefield as soon as an alternative location can be found, resulting in the only FCPA-based girls' softball complex comprising six permanently fenced softball fields.

Periodic Reviews

Once per year, CRS, FCPA, and FCPS will assess conditions of fields and amenities for girls' softball and baseball for all school and park fields. Priorities should be set for repairs and improvements based on safety, playability, gender equity, need and funding availability. In this assessment, countywide conditions should be considered as well as the local conditions. The FCPA will continue to promptly inform CRS of any plans for upgrades including gifts to boys' baseball fields. CRS is responsible for allocating fields to ensure equity.

Attachment 2

Detailed Status of Equity on Fields

The table below lists all scheduled softball and baseball fields for boys and girls ages 7 – 18. The fields are grouped by location, elementary and middle school, high school and parks. The primary users, e.g., baseball, adult softball, girls' softball, and amenities that determine the field quality level, are shown (for example, lighting and irrigation, outfield fencing, dugouts, bleachers, etc.).

Legend

1. Overlay - whether or not the outfield is used for other sports, e.g., soccer, hockey, football
2. PA/ HS/ ES/ MS / C – field owner: Park, High School, Elementary or Middle school and Community Center, or County Field
3. Field type: SB, BB, ASB – Fastpitch softball, baseball, adult softball
4. G/P – Indicates how field is scheduled: Game field – g, Practice field – p, Not scheduled – N/S due to renovation, etc.
5. Infield type – skinned (all dirt) or grass
6. SL Fence – Side line fence
7. OF Fence/ Dimensions – Outfield Fence, dimensions or height is shown if available
8. Lights – X indicates the field is lighted
9. Irrigation – X indicates the field is irrigated
10. Dugouts – X indicates there are concrete pads in the dugout
11. Dugout benches- indicates the type of bench. Blank if information is not available
12. Batting Cage – X indicates there is a batting cage at the field
13. Bleacher pads – X indicates there is a concrete pad under the bleachers
14. Bleachers – Indicates there are bleacher and in some cases the types
15. Field Level – 1 (lighted and irrigated), 2 (lighted or irrigated), or 3 (neither lighted nor irrigated))
16. District – The magisterial district where field is located. For schools, the school service area may extend into other districts. Schools within Fairfax City limits list the adjacent Fairfax County magisterial district
