

CCFP RFP | TAC Tool: Positive Behaviors and Healthy Relationships

Outcome Statement: To develop positive behaviors and healthy relationships that are safe and free from abuse, neglect and trauma and promote physical, emotional, mental, and social well-being.

Assault and abuse can affect people across their lifespan and have far-reaching effects. About 38% of the people experiencing homelessness in the [Point in Time Count](#) were either **fleeing a Domestic Violence situation (10%)** or had a **history of Domestic Violence (28%)** in 2023.

2.4% of FCPS 8th - 12th graders reported that they had been forced to have sexual intercourse when they did not want to

[2022 Fairfax Youth Survey, Table 121](#)

8% of older Fairfax County residents indicated they had minor, moderate or major problem of being physically or emotionally abused. These levels remained consistent from 2019 except for the 70 – 79 age range where a 2% increase is observed.

Fairfax County 50+ residents reporting minor, moderate, or major problem of being physically or emotionally abused

[2022 CASOA Survey, Safety](#)

A December 2021 report on Social Isolation and Loneliness (SIL) in Fairfax County explains that a large body of research has demonstrated that SIL increases the risk of premature death as well as physical and mental illness. Studies support both behavioral health factors (e.g., sleep, routine medical screenings, physical activity) and biological mechanisms (e.g., blood pressure, levels of inflammation) to explain the relationship between SIL and these outcomes.

28.9 % of students who felt sad or hopeless in the past year

[2022 Fairfax Youth Survey, Table 178](#)

Results from the 2022 [Fairfax County Youth Survey](#) and the 2022 [50+ Community Survey](#) both show that about 30% or more of youth and older adults report feelings of sadness and loneliness, though the prevalence is not evenly distributed. While this rate is lower for FCPS students compared to 2021, it increases as students get older. Rates increased for the 50+ community except for the 80+ age group.

Fairfax County 50+ residents reporting minor, moderate, or major problem of feeling depressed
