### **RESTON TOWN CENTER NORTH** RA DRB CONCEPTUAL SUBMISSION

11.12.2019

# LandDesign CREATING PLACES THAT MATTER.

# TIMELINE

Following the Feb 2018 Reston Association Design Review Board (RA DRB) presentation, the Fairfax County and Inova consultant team has creatively and thoughtfully evolved the Reston Town Center North (RTCN) master plan to incorporate feedback from the following stakeholders and agencies:

May & Nov 2018	RA DRB Wo
March - May 2019	Fairfax Cou
April - June 2019	VDOT and F
June - July 2019	Team Work
July 2019	RA DRB Wo
July - Oct 2019	Team Work
Nov 2019	RA DRB Cc

# **RA DRB JULY 2019 FEEDBACK**

#### SUMMARY OF KEY INPUT:

#### **1. Street Grid**

- July plan was much improved over previous FFX County Comprehensive Plan layout and reflected past DRB comments to reflect Reston character in the overall master plan.
- Curvilinear block layout works well with the site's existing topography and treed areas.
- Consensus to move forward with the street grid as proposed.

#### 2. Central Green & Open Space

- Request for vision plan for the central green. Should reflect a strong sense of place and show how the overall open spaces are connected.
- Central green should not be like Reston Town Center (more trees less hardscape). Program not need concert venue).
- Preserve as many trees as possible.

#### **3. RA DRB Process**

• Conceptual approval requested for street and block layout and central green vision, not the Those to be reviewed with each block in future.

#### 4. Project Name & Character

• Overall development is not Reston Town Center "North" in character or program. It needs a new working name. Suggestion from RA DRB to change the name.

multi-layered park experience. Provide a concept plan for the central green, to also include &

and design should be more neghborhood focused and have a Reston community feel (i.e. do

development program, architecture, block-specific streetscape and open spaces within blocks.

#### **CAMERON GREEN** RESTON, VA • TREE SURVEY PN 2019070 | 11.12.2019 | INOVA | FAIRFAX COUNTY

#### **EXISTING FEATURES** CONSIDERATIONS

The Tree Inventory Plan for the Reston Town Center North site represents a survey of 2,716 trees located on the property. All trees four inches (4") and greater DBH were reviewed in the field and condition ratings established according to International Society of Arboriculture procedures. Trees are rated based on roots, trunk, scaffold branches, small branches and twigs, and foliage/buds for structure and health to generate a score on a 100 point scale. A score of zero means the tree is dead; a score of 100 is a tree in perfect condition.

The trees on the property range from poor to excellent condition, with the majority of them in the good range.

#### **Tree Condition Summary:**

119 trees	Dead (0-5% rating)
3 trees	Very Poor Condition (6-20% rating)
166 trees	Poor Condition (21-40% rating)
906 trees	Fair Condition (41-60% rating)
1,423 trees	Good Condition (61-80% rating)
99 trees	Excellent Condition (81-100% rating)

The trees are generally in two broad groupings landscape plantings and naturally occurring trees. Landscape planted trees range from poor to good condition and are a variety of native and non-native trees that are typical for the time they were installed with the construction of the buildings on the property. The naturally occurring trees include a mid-successional stage of maturing Virginia Pine to red maples to a couple of more diverse mature areas. Due to human activity, regeneration is suppressed in much of the naturally forested areas and in a few areas, invasive species are present.

**CAMERON GREEN** RESTON, VA • ROAD GRADING PLAN PN 2019070 | 11.12.2019 | INOVA | FAIRFAX COUNTY

#### **Site Acreage 47 Acres**

#### **Existing Conditions**

- The existing grades around the perimeter of the site are established by the surrounding roadways.
- The existing grades of the recently constructed North County Government Center are established by its recent design/construction.
- There is a 60' grade difference across the site from East to West.

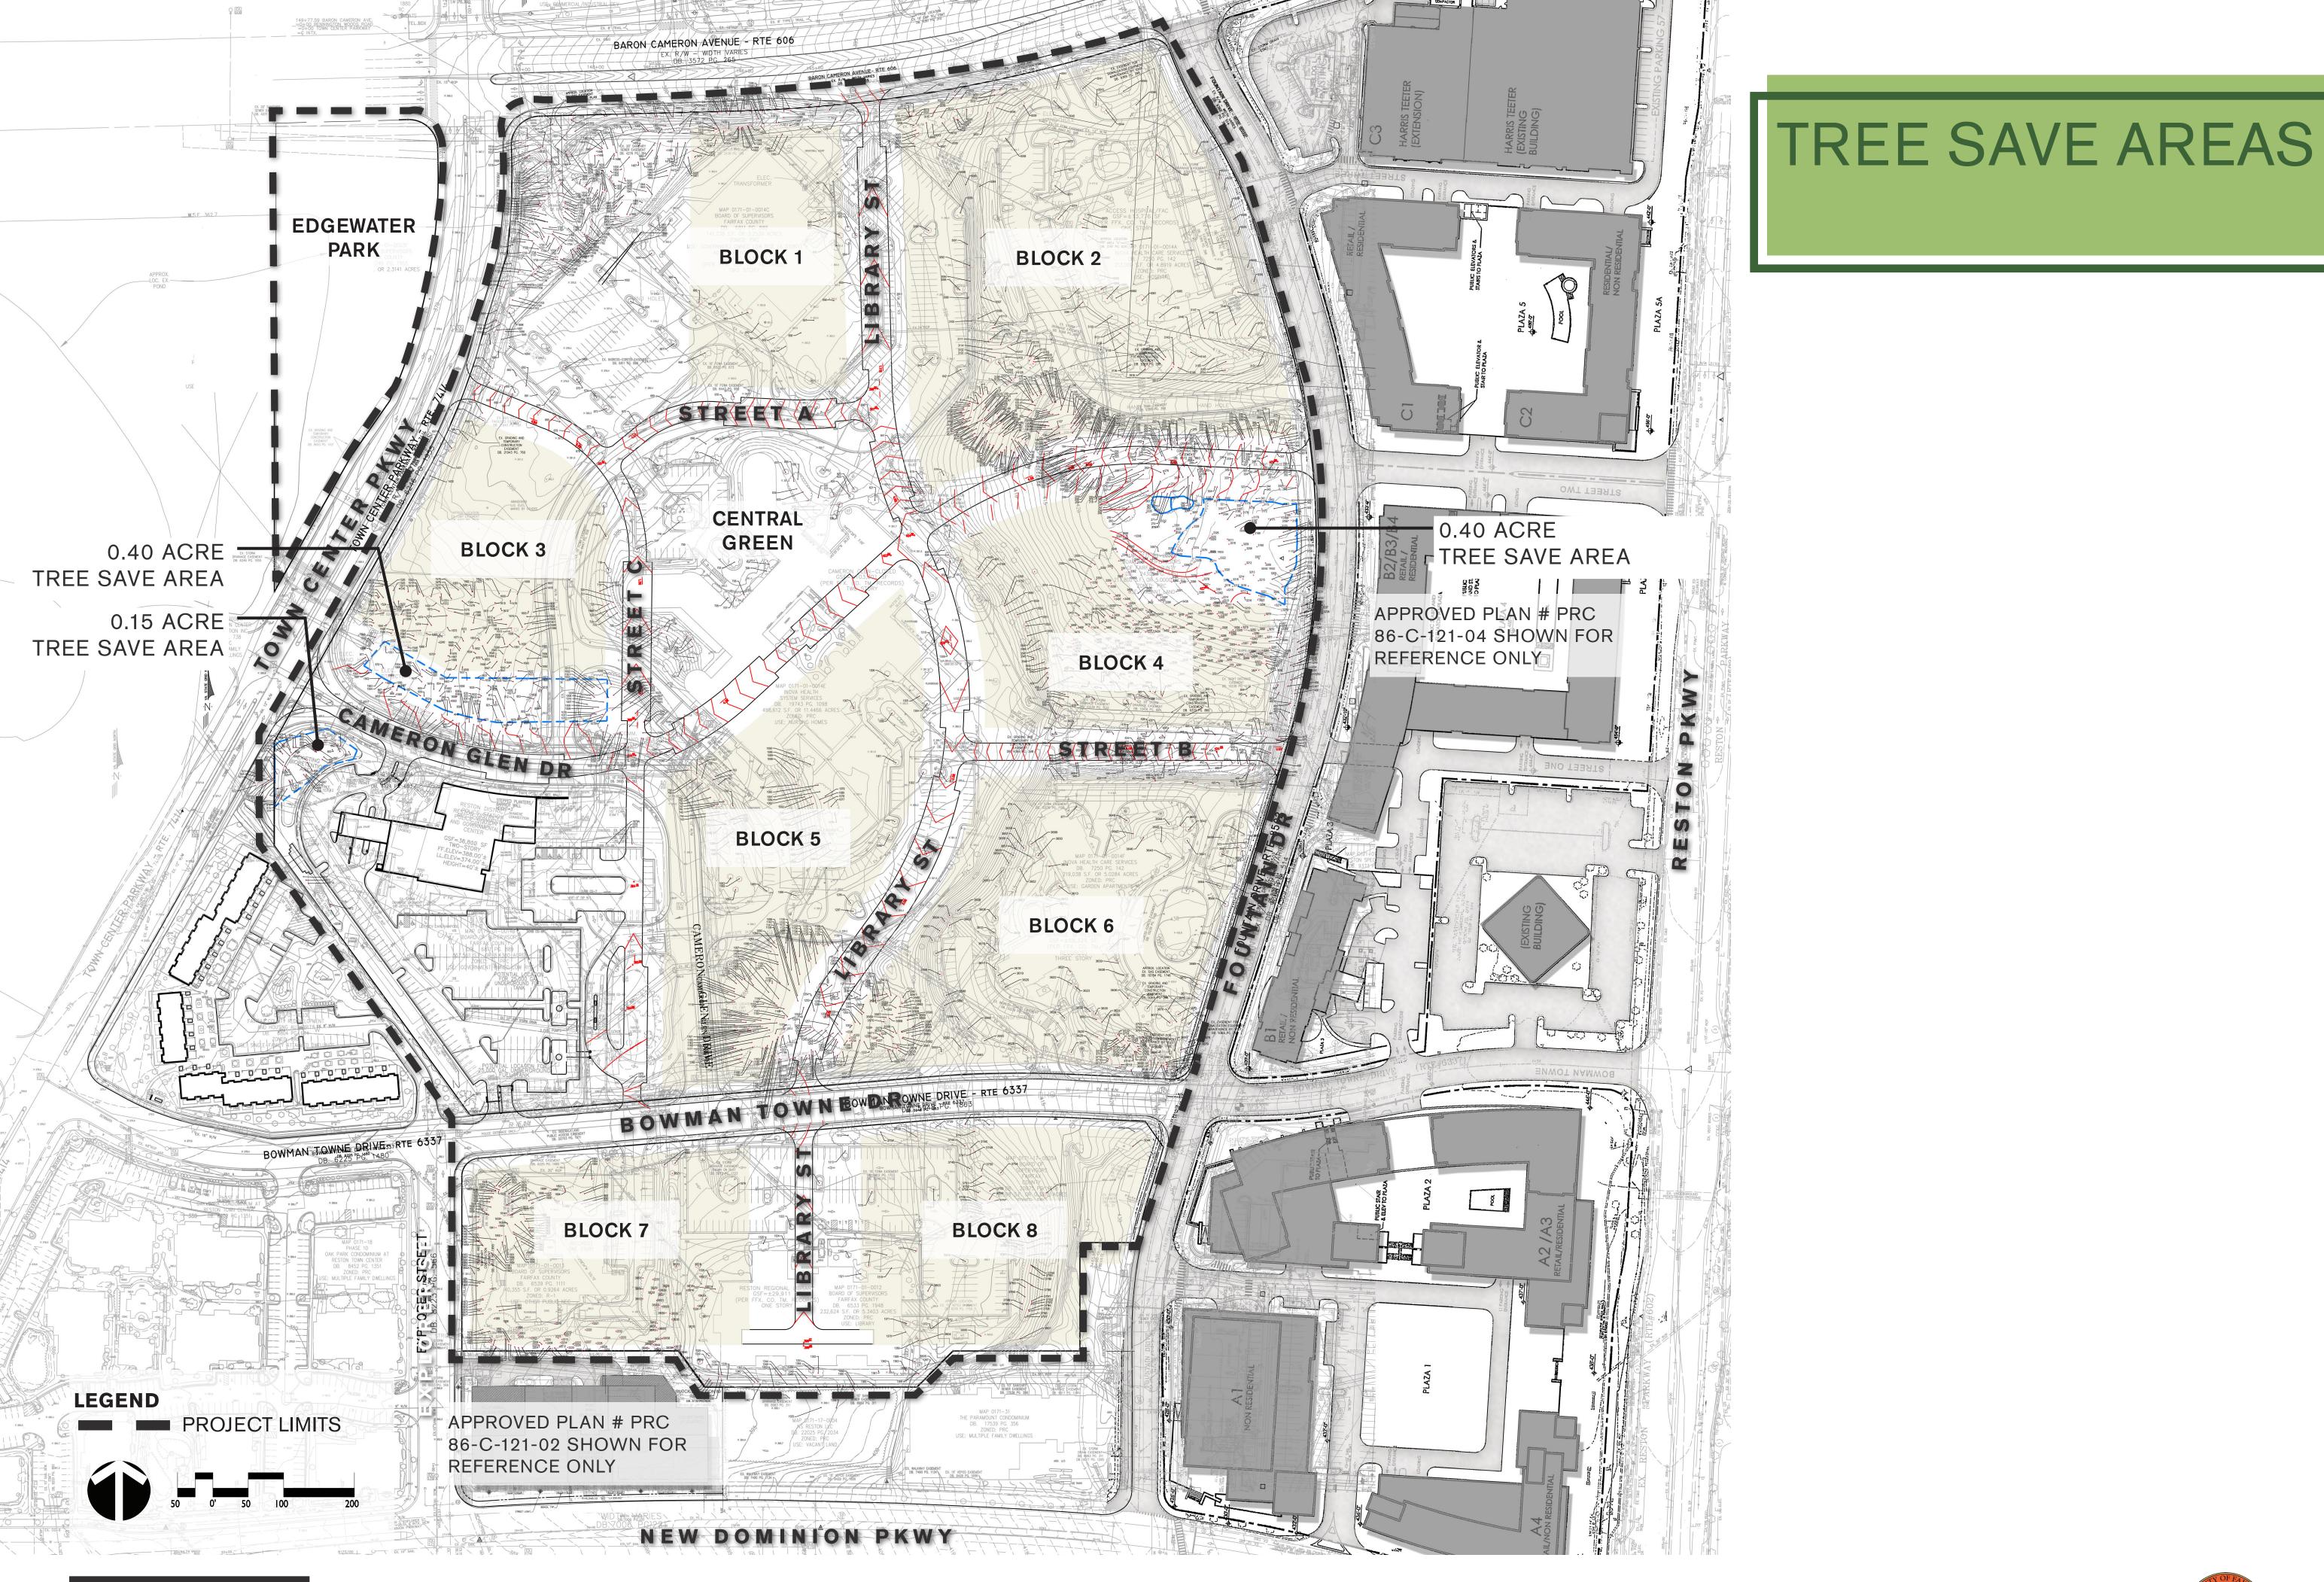

#### **Proposed Grading Scheme**

- Maintain road grades at less that 5% to the extent possible to maximize potential ADA accessibility as well as provide convenient/ useable parallel parking.
- Provide access into and through the site via accessible pedestrian and bike facilities.
- Identify areas of tree save.

# CENTRAL GREEN character

**CAMERON GREEN** RESTON, VA - OVERALL VISION PN 2019070 | 11.12.2019 | INOVA | FAIRFAX COUNTY

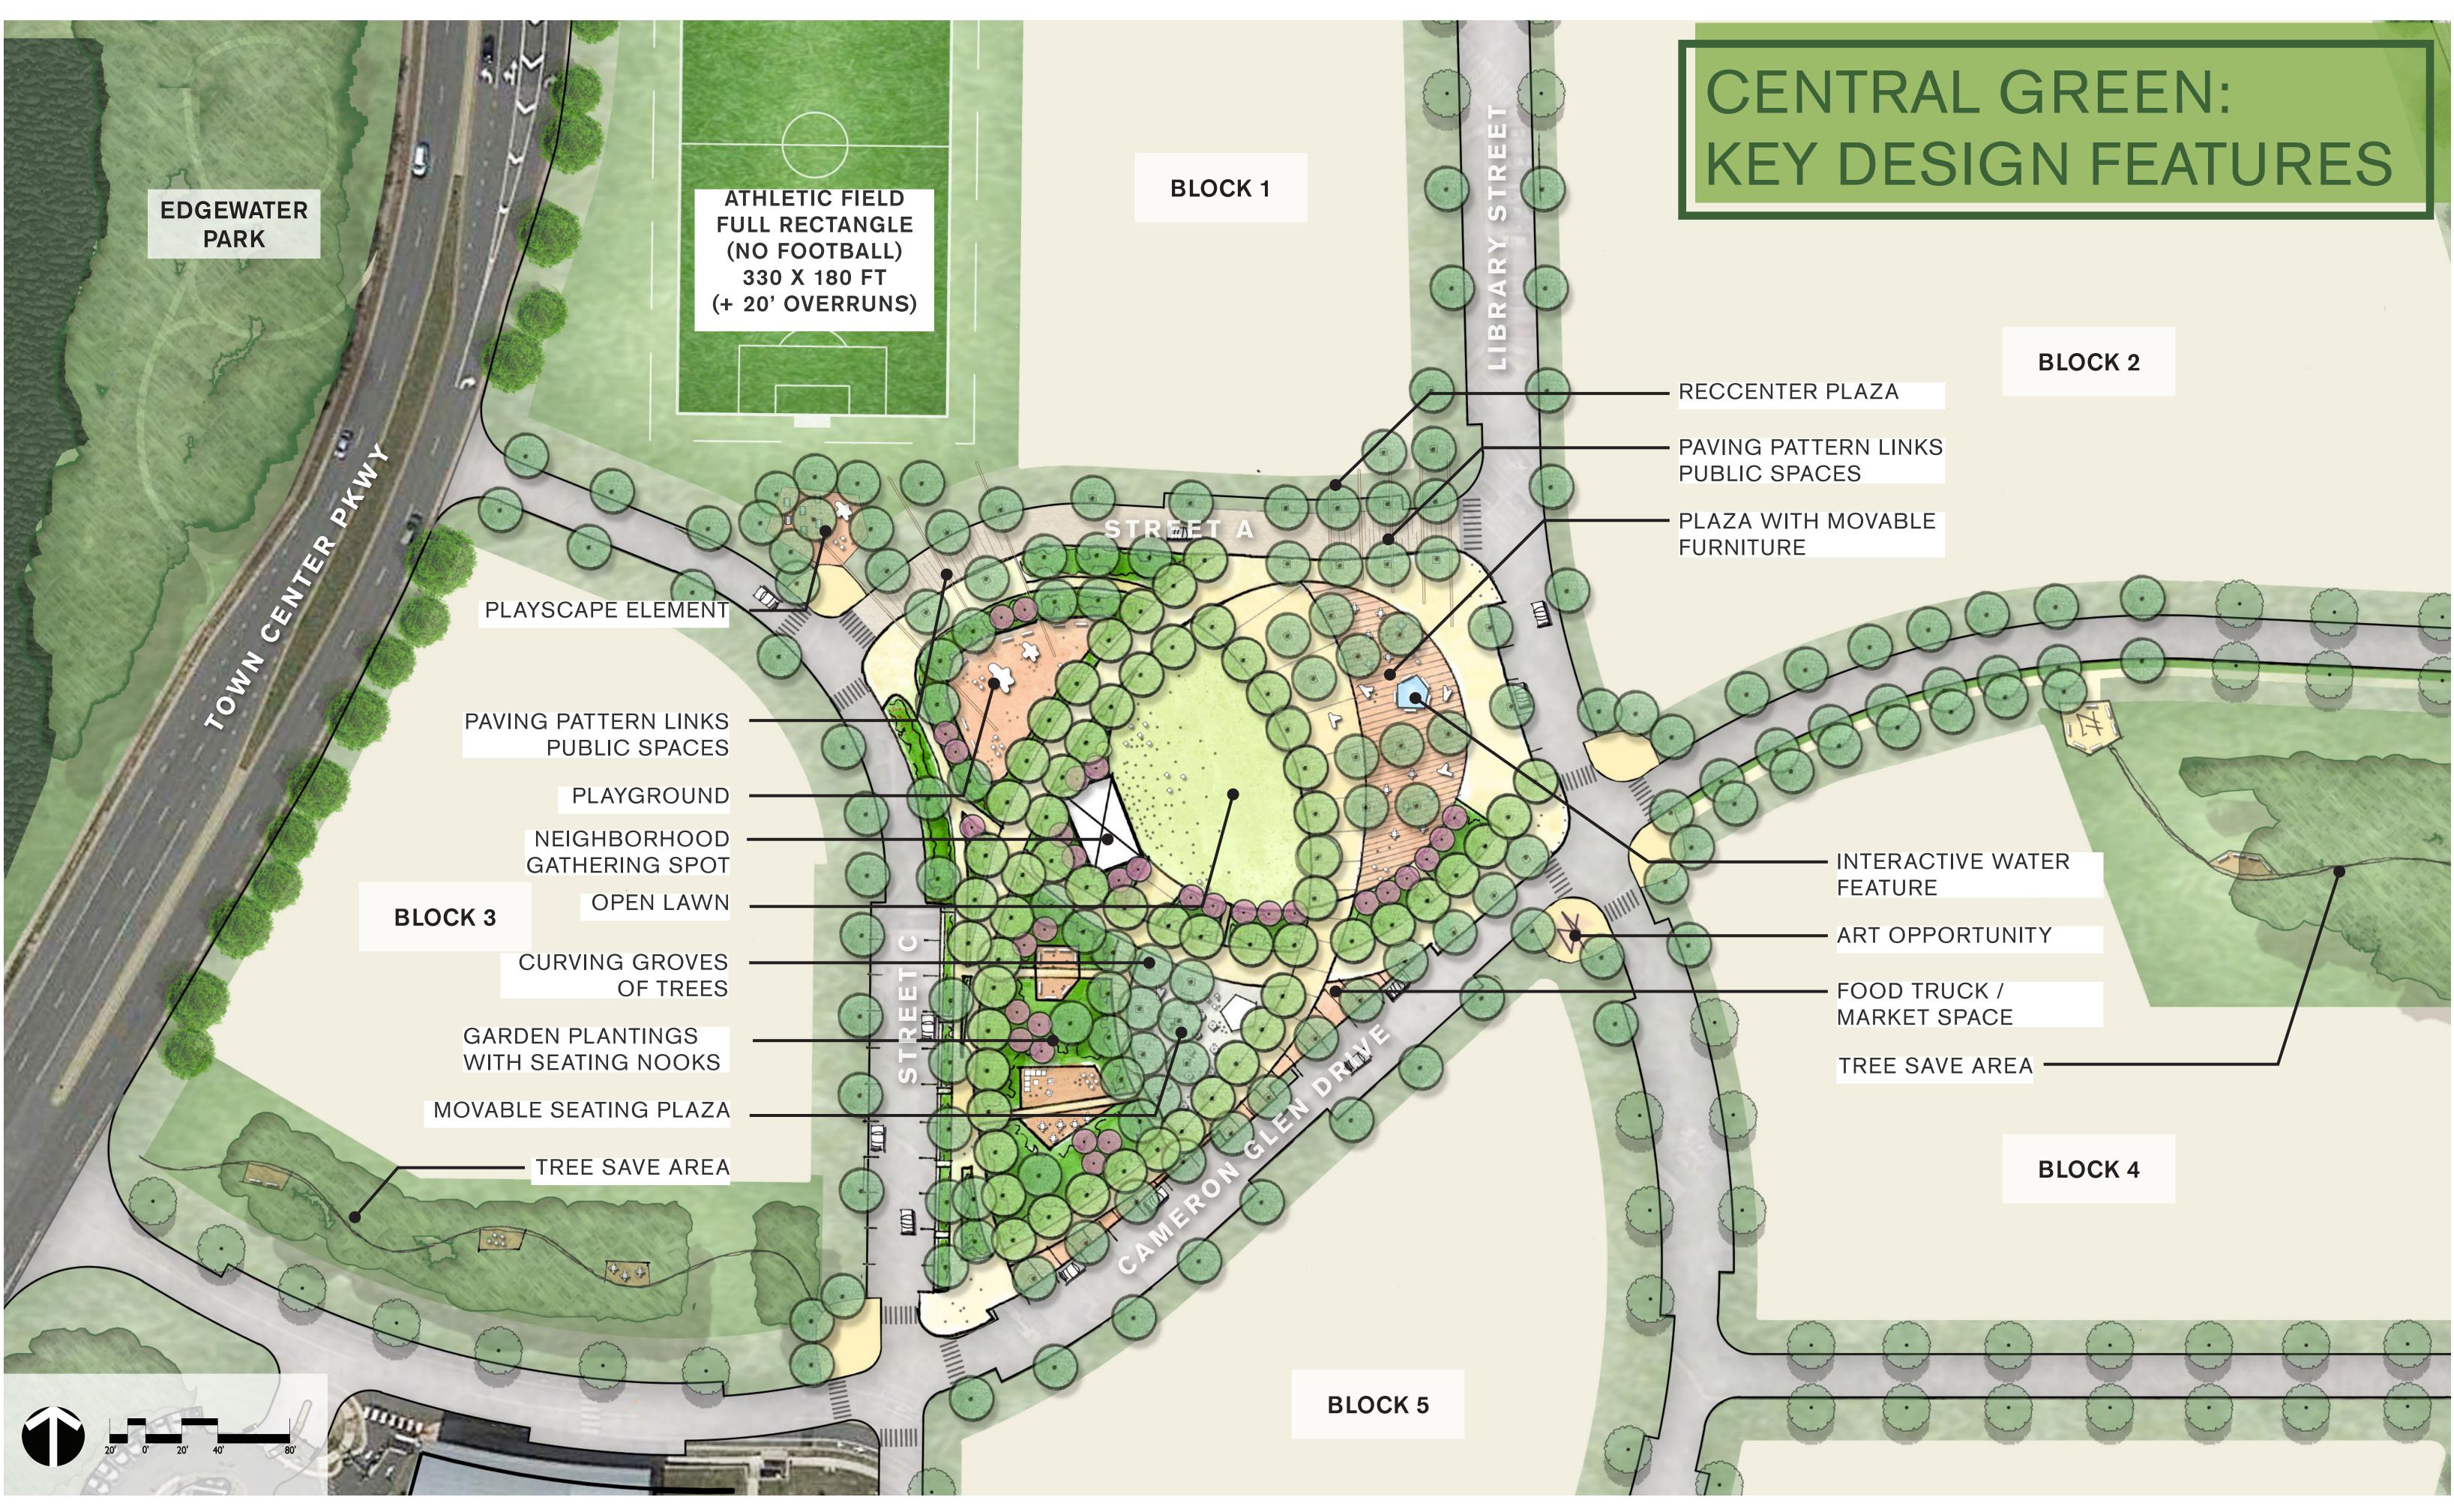

#### **CENTRAL GREEN: OVERALL VISION**

- A Reston park in a new forest
- Central park located between Blocks 1, 2, 3, 4 & 5 with strong connections to over master plan
- Organic shape of park contextually considers topography, street grid, development blocks, and tree save areas
- Links the upland forest stands of trees being preserved along both ends of Cameron Glen Dr with trails
- Pathways engage users from all directions into the park
- All four park edges and sides consider engagement with future uses
- Neighborhood focused program and character
