

Carbon Neutral Counties Declaration

Update

Supervisor Storck, Environmental Committee Chair

June 15, 2021

Carbon Neutral Counties Declaration

The proposed declaration is a commitment county governments can make to reduce their operational greenhouse gas emissions. Signatories would be asked to:

- Commit to being energy carbon neutral by 2040;
- Urge federal and state lawmakers to provide incentives, requirements or other such measures to meet the carbon neutral goal; and
- Ensure equitable implementation of the goal so that no communities are disproportionately impacted by the transition to a carbon neutral economy, and all have access to the benefits that may arise.
