SMOKE ALARMS

Obey the Law Save Your Life!

FAIRFAX COUNTY
FIRE AND RESCUE DEPARTMENT

Smoke Alarms Can Save Your Life –

Obey the Law

How do we know that smoke alarms can save lives?

It's a proven fact. Smoke alarms installed and maintained properly can double your chances of surviving a fire.

- According to the National Fire Protection Association, in 2015, there were 1,345,500 reported fires in the United States, resulting 3,280 deaths, 15,700 injuries and \$14.3 billion in direct property damage.
- Nationwide, there was a civilian fire death every 2 hours and 40 minutes.

Early warning systems, such as smoke alarms, could statistically save **half** of these lives and greatly reduce property damage.

Approximately 80 percent of all fire deaths in the United States occur in the home. Fatal residential fires most often occur at night when residents are sleeping. In most cases, the best way to survive a residential fire is early fire detection and rapid escape to a safe area.

During fiscal year 2016 (July 1, 2015 - June 30, 2016), the Fairfax County Fire and Rescue Department responded to 281 residential fires where smoke alarms provided early warning to the occupants.

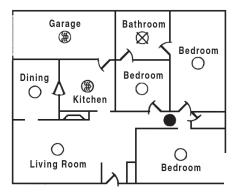

Installation Tips

• Choose a smoke alarm that bears the label of

recognized testing laboratory.

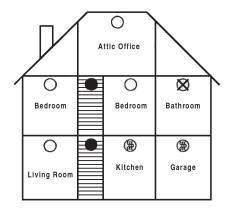

• Install smoke alarms every level of the home and outside all sleeping areas.

 For added safety, install smoke alarms in every room where people sleep.

 To increase safety, have a qualified electrician install hard-wired, interconnected smoke alarms so that when one sounds, they all sound.

Smoke Alarm Maintenance

Routine maintenance includes three basic steps: vacuuming, testing and changing the battery.

 Clean the smoke alarm monthly by gently vacuuming to remove dust and cobwebs allowing proper air flow through all vents.

 Test the smoke alarm every month following the procedures recommended by the manufacturer.

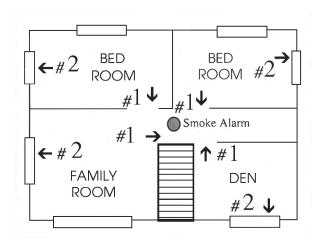

- Replace the battery annually. An easy way to remember this is to change the battery every fall at the same time that you change your clocks back for daylight savings time.
- Replace smoke alarms that use extended-life, lithium batteries when the alarm "chirps" or fails to respond to periodic testing. The batteries in these units cannot be replaced.
- Replace all smoke alarms when they reach 10 years old.

Plan your Escape

Once a fire starts, it spreads rapidly. You may have only seconds to get out. Normal exits may be blocked by smoke, heat and/or fire. It is important that everyone knows what to do.

Plan two exits from every room. All family members should know all escape routes. Choose a meeting place outside the residence so you will know everyone has escaped. Practice escaping to test your plan before a real emergency.

If there is a need for immediate escape, don't waste time trying to fight the fire, and don't stop to call the fire department from inside the house. Get out and call 911 from a neighbor's phone or from another safe location. Staying in the house to call may cost you your life!

Smoke Alarms Save Lives; And It's the Law

ARTICLE 5. Smoke Detectors

Section 61-5-1. Scope.

In addition to the requirements of the Virginia Uniform Statewide Building Code (VUSBC), and in accordance with authority provided by *Code of Virginia*, Section 15.2-922, the provisions of this Article shall govern the installation and maintenance of smoke detectors. (9-84-61; 29-84-61; 23-94-61; 13-95-61; 16-98-61;5-02-61.)

Section 61-5-2. Where required.

Smoke detectors shall be installed in the following structures regardless of when constructed:

- (a) All buildings containing one (1) or more dwelling units.
- (b) Hotels or motels regularly used, offered for, or intended to be used to provide overnight sleeping accommodations for one (1) or more persons.
- (c) Rooming houses regularly used, offered for, or intended to be used to provide overnight sleeping accommodations.
- (d) College or university buildings containing dormitories for sleeping purposes.
- (e) All local and regional detention homes, group homes, and other residential care facilities for children or juveniles which are operated by or under the Department of Juvenile Justice.
- (f) All adult care residences and adult day care centers licensed by the Department of Social Services. (9-84-61; 23-94-61; 13-95-61; 16-98-61; 5-02-61.)

Section 61-5-3. Installation requirements.

- (a) Smoke detectors installed pursuant to this Article shall be installed in conformance with the provisions of the VUSBC.
- (b) Appropriate permits as required by the VUSBC shall be secured for the installation for the installation of AC-powered smoke detectors; however, no fee will be charged for the permits.
- (c) The smoke detectors shall be installed in locations specified in the applicable sections of the VUSBC. (23-94-61; 13-95-61; 16-98-61; 5-02-61; 15-05-61.)

Section 61-5-4. Responsibilities for rented or leased units.

The owner of any unit which is rented or leased, at the beginning of each tenancy and at least annually thereafter, shall furnish the tenant with a certificate that all required smoke detectors are present, have been inspected, and are in good working order. Except for smoke detectors located in hallways, stairwells, and other public or common areas of multi-family buildings, interim testing, repair, and maintenance of smoke detectors in rented or leased units shall be the responsibility of the tenant; however, the owner shall be obligated to service, repair or replace any malfunctioning smoke detectors within five (5) days of receipt of written notice from the tenant that such smoke detector is in need of service, repair, or replacement.

Landlords shall notify deaf or hearing-impaired tenants of the availability of special smoke detectors. New tenants shall be asked, in writing, at the time of rental, whether visual smoke detectors will be needed. Upon request, the landlord or proprietor shall provide visual smoke detectors, which have an effective intensity of not less than 100 candela, to any deaf or hearing-impaired occupant of any of the following occupancies, regardless of when constructed:

- (a) All dormitory buildings arranged for the shelter and sleeping accommodations of more than twenty individuals.
- (b) All multiple-family dwellings having more than two dwelling units, including all dormitories, boarding and lodging houses arranged for shelter and sleeping accommodations of more than five individuals.
- (c) All buildings arranged for use as single-family attached or detached dwelling units. (23-94-61; 13-95-61; 16-98-61; 5-02-61.)

Section 61-5-5. Enforcement.

The Building, Building Maintenance Official and/or Fire Official are authorized to administer and enforce this Article. (29-84-61; 23-94-61; 13-95-61; 16-98-61; 5-02-61; 15-05-61.)

Section 61-5-6. Relation to other codes.

Nothing in this Article shall excuse any building owner from compliance with all other applicable provisions of the VUSBC and the Code of the County of Fairfax. (9-84-61; 23-94-61; 13-95-61; 16-98-61; 5-02-61.)

HOME FIRE SAFETY SURVEY

This form is designed to help you check your home for fire hazards. All the questions are worded so a "YES" answer means the area is safe. A "NO" answer means a fire hazard exists and needs to be corrected. If you have any questions about how to correct a hazard, call your local fire station or Community Risk Reduction at 703-246-3801 or TTY 711 for assistance.

 HEATING HAZARDS: Combustibles like clothes, curtains and furniture are away from fireplaces and space heaters. Heating appliances are tested every year. There is a screen in front of the fireplace. Ashes are emptied into covered metal containers. 	YES	NO
 All alternative heating devices used are U.L. listed. 		
 ELECTRICAL HAZARDS: Electric cords are checked to be sure they are not worn, frayed, or damaged. Extension cords are not run under rugs, over nails, through water, or across passageways. Proper size fuses are used in all sockets. Each circuit is properly marked. Electrical outlets are not overloaded by multiple plug devices. Electric appliances are not used near water. 	YES	NO
 GENERAL HOUSEKEEPING HAZARDS: Closets, basements, attics, and garage areas are clean of old paper, boxes, paint cans, and other trash. Rubbish is thrown away regularly. Everyone in the family knows NOT to use a flammable liquid, like gasoline, for cleaning. 	YES	NO

 Flammable liquids and oily rags are disposed of after use or stored in a tightly closed metal container. All combustibles (bags, boxes, and newspapers) are stored a safe distance away from any possible heat source (furnace, hot water heater.) 		
 SMOKING HAZARDS: Matches and lighters are kept out of the reach of children. Smokers use ashtrays that are large, deep, and designed for use with smoking materials. 	YES	NO
 KITCHEN HAZARDS: The kitchen is kept clean all the time. The stove and oven are in good working condition. The stove area is kept clean and free of grease. Combustible materials (like towels and pot holders) are kept away from open flames and heat sources. Someone is always in the kitchen when food is cooking. 	YES	NO
 GENERAL FIRE SAFETY: The house address is clearly posted in large numbers that are easy to read from the street. There is a working smoke alarm near the sleeping areas. There is a working smoke alarm on every level. The smoke alarm is cleaned regularly and tested once a month. 	YES	NO

 Everyone in the home knows the emergency telephone number for fire and rescue. (9-1-1 in Fairfax County) 	
 This number is posted on all telephones for immediate reference. You have portable fire extinguishers suitable for use in your home and adult family members know how to use them properly. You have a home escape plan and practice it regularly. 	
If you have any "NO" answers, sit down with you he problem and how it can be corrected. Take this are safety awareness in ALL family members and, a your home a safer place to live.	opportunity to create
